

Rep. Tom Emmer on Emmer Thanks the Best Buy Foundation for Serving the Underserved

Broadcast: December 01, 2016 • Duration: 0:54

REP. TOM EMMER:

Mr. Speaker, I rise today to celebrate a great Minnesota company that is actively helping our nation's students develop skills that will help them shine in their future success. I am proud that Minnesota's own Best Buy Foundation is giving grants to form programs that will give students the chance to master important technology skills like coding and graphic design. The world that we are living in is rapidly transforming and technology is quickly becoming more than just a luxury. It is becoming a way of life and a key ingredient to our nation's future success. What is perhaps most commendable about Best Buy's grant programs is that it targets teens who live in underserved communities. If we as a nation hope to remain not only relevant but competitive, then everybody must have the chance to strive and I would like to thank the Best Buy Foundation for recognizing the importance of serving the underserved. Note: This appears to be House floor remarks rather than a TV/radio interview transcript, as evidenced by the formal Congressional speaking protocol ("Mr. Speaker, I rise today...").

This transcript was independently produced by MN-06 Watch for accountability and archival purposes.
